### 5. Fire fighting measures

**Extinguishing media:** Product itself is not explosive or flammable. The product itself will not burn. If anything, packaging may be involved in a fire. Use CO<sub>2</sub>, dry chemical powder, alcohol resistant foam or other media appropriate for materials actually involved in the fire. If water is used, contain run-off.

**Special hazards:** When heated sufficiently, product may decompose to form smoke and toxic fumes.

**Special protective equipment:** Fire fighters should wear approved self-contained breathing apparatus and full protective clothing.

### 6. Accidental release measures

#### Personal precautions:

Avoid contact with skin and eyes. For appropriate personal protection see section 8.

#### Environmental precautions:

Although this product is suitable for down the drain disposal it is advised that as much of the liquid is contained and absorbed with a suitable media, before final dispersal of any residue with water.

## **Methods and material for containment and clean-up:**

Prevent leakage into sewers or surface water by utilising bunding, absorbent booms, drain covers and soil or sand dikes. Contact appropriate environmental protection agencies, (Environment Agency in the UK) and local water authorities if significant contamination occurs.

For small and large spills: pump/ transfer spillage into suitable plastic containers and rework/dispose as per local legislation.

## **7. Handling and storage**

### **7.1 Precautions for safe handling:**

Avoid contact with neat product on skin and eyes. Wear protective clothing as per section 8.

### **7.2 Conditions for safe storage, including any incompatibilities:**

**Additional information:** The lists that were valid during the compilation were used as basis.

### **8.2 Exposure controls:**

#### **Personal protective equipment**

Wear suitable protective clothing, gloves and eye/face protection.

#### **General protective and hygienic measures**

Keep away from foodstuffs, beverages and food. Instantly remove any contaminated garments. Do not eat, drink or smoke while working. Avoid contact with the eyes and skin. Do not inhale aerosols. Wash hands during breaks and at the end of the work. Use skin protection cream for preventive skin protection.

#### **Respiratory protection:**

Not needed.

**Hand protection:** For the contact with product protective gloves made from Nitrile (material thickness > 0.1 mm, break through time > 480 min class 6) are recommended according to EN 374. In the case of longer and repeated contact please note that in practice the penetration times may be considerably shorter than those determined according to EN 374. The protective gloves must always be checked for their suitability for use at the specific workplace (e.g. mechanical and thermal stress, antistatic effects, etc.). The gloves must be replaced immediately at the first signs of wear and tear. We recommend to change single use protective gloves periodical and a hand care plan in cooperation with a glove manufacturer and the trade association in accordance with the local operating conditions.
